BACTERIA	
<i>Staphylococcus aureus</i> (Staph)	3 min

Directions for Use

Step 1: Preparation

1. Gather supplies.

2. Wash hands with soap and water.

3. Put on PPE required by your facility¹.

1. PPE is not required for using this product, so we recommend following your facility's PPE policy.

Step 2: Application

To clean and disinfect hard, nonporous surfaces

1. Clean visible soil.

2. Squirt disinfectant 15-20cm away from surface.

3. Surface needs to stay wet for the contact time².

4. Wipe. (No rinsing required, unless it is used on food-contact surfaces.)

To clean and disinfect toilets and urinals

1. Remove visible soil.

2. Apply disinfectant to surfaces above the water line.

3. Brush thoroughly, especially under the rim.

4. Surface needs to stay wet for the contact time².

5. Flush.

2. Contact time ranges from 30 sec. to 10 min., depending on the pathogens. See the Disinfection Efficacy Claims page(s) for exact contact time.

Directions for Use (cont.)

To sanitise soft surfaces

1. Remove visible soil.

2. Squirt disinfectant 15-20cm from surface until fabric is wet. Do not saturate.

3. Wait for 3 min.

4. Air dry (reapply if odour/stain persists).

To clean and decontaminate against bloodborne pathogens on surfaces soiled with blood and body fluids

1. Wear disposable impervious gloves, gowns, masks and eye coverings.

2. Thoroughly clean and remove blood and other body fluids from surfaces with a cleaner.

3. Squirt disinfectant 15-20cm from surface.

4. Surfaces needs to stay wet for the contact time.

5. Dispose infectious material in accordance with local regulations for infectious waste disposal.

Step 3: Wrap Up

1. Discard disposable supplies; clean and disinfect reusable tools.

2. Store products.

3. Remove PPE.

4. Wash hands with soap and water.
